

Korisnici programa Porezne prijave koji rade u novijim Windowsima možda imaju generalni problem s radom programa kod izrade nekih obrazaca ako im administrator nije dodijelio sva prava pristupa dokumentima programa.

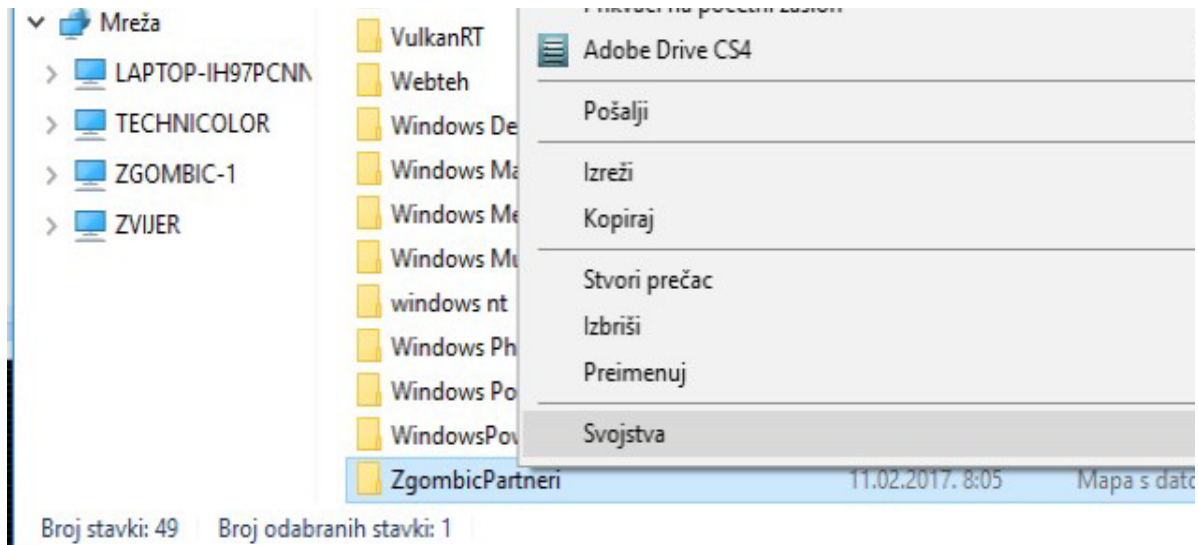

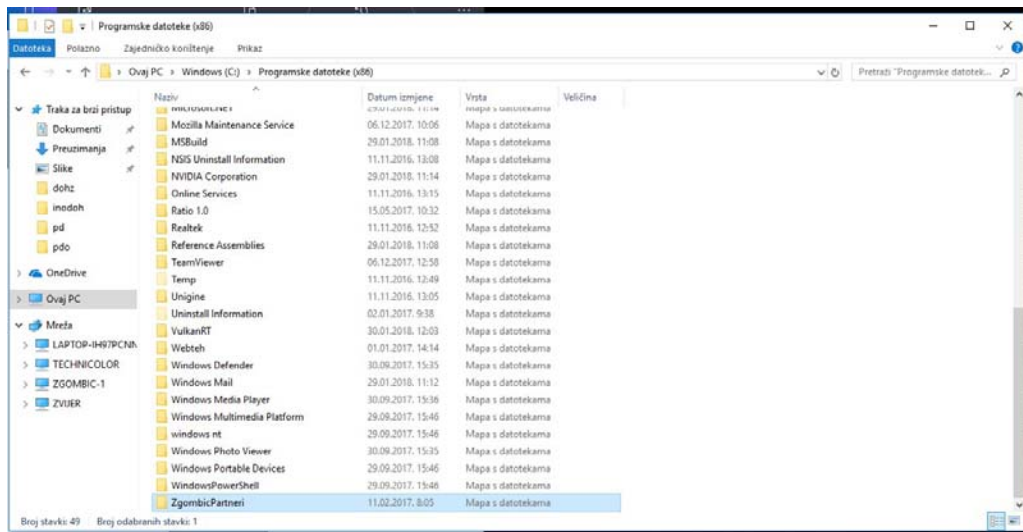

To se može izbjeći na sljedeći način:

1. u exploreru pronaći ove mape:

C:\ProgramData\ZgombicPartneri

C:\Program Files (x86)\ZgombicPartneri

2. desna tipka miša na odabranu mapu i odabrati "Svojstva" ili "Properties"

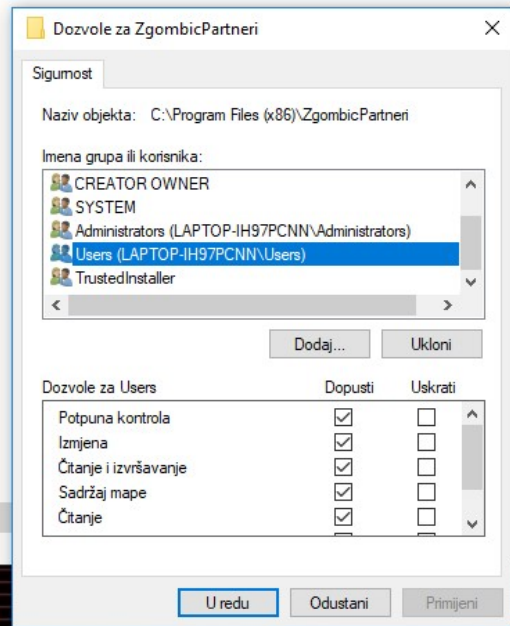

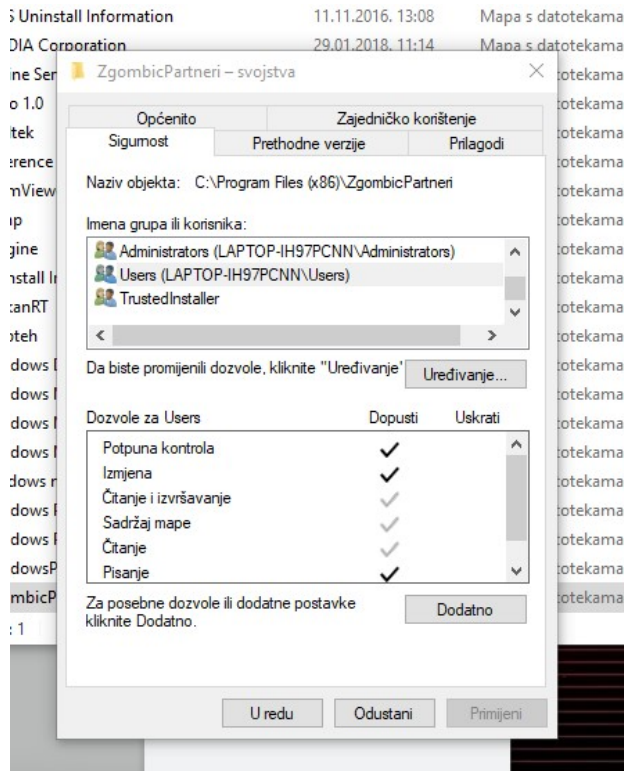

### 3. odabrati "Sigurnost" ili "Securities"

The screenshot shows a Windows File Explorer window with the path 'Ovaj PC > Windows (C:) > Programske datoteke (x86)'. The 'ZgombicPartneri' folder is selected, and its properties dialog box is open. The 'Security' tab is active, showing the object name 'C:\Program Files (x86)\ZgombicPartneri' and the selected user group 'Users (LAPTOP-IH97PCNN\Users)'. The permissions table is as follows:

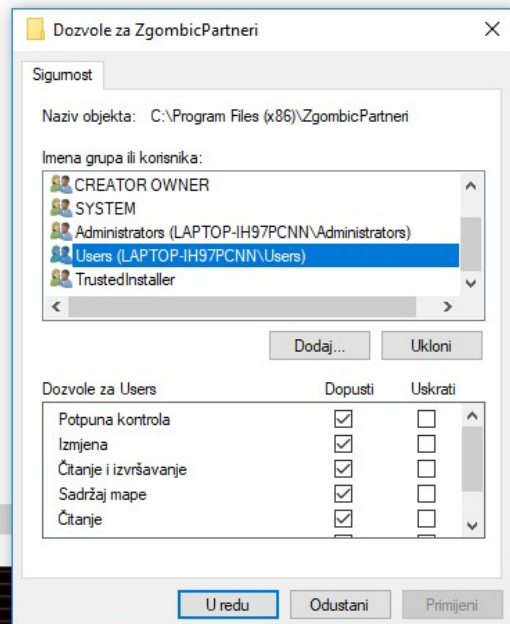

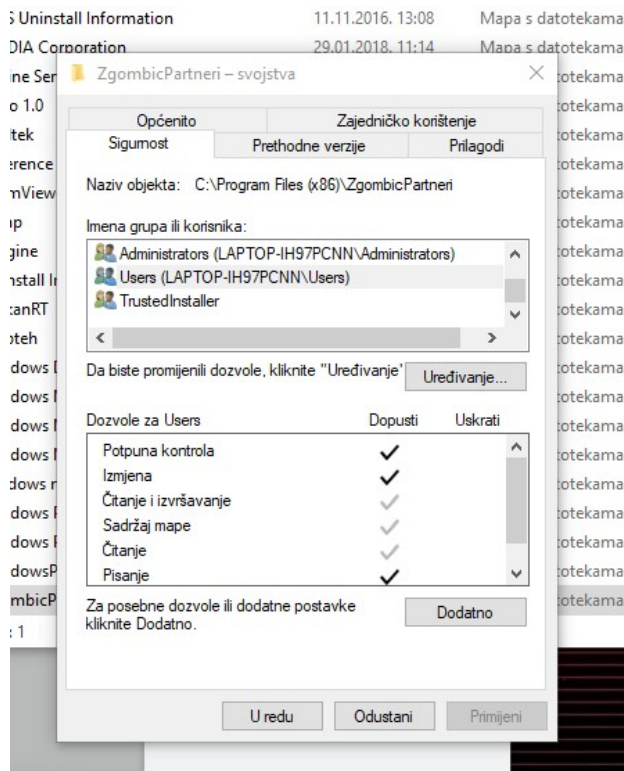

Dozvole za Users	Dopusti	Uskrati
Potpuna kontrola	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Izmjena	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Čitanje i izvršavanje	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sadržaj mape	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Čitanje	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Pisanje	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Buttons at the bottom of the dialog include 'U redu', 'Odustani', and 'Primijeni'.

#### 4. Odabrati "Uređivanje"

#### 5. Odabrati "Users" i odabrati "Potpuna kontrola"

Kad se korisniku dodijele sva prava tada u toj mapi program kod korisnika može mjenjati određene dokumente koji su mu potrebni za rad.

To treba napraviti za obje ove mape:

C:\ProgramData\ZgombicPartneri

C:\Program Files (x86)\ZgombicPartneri
